INTRODUÇÃO

Aqui estão apresentados os projetos residenciais de Rino Levi e Vilanova Artigas, base para a análise que efetuamos no Volume I desta tese.

Definimos como parâmetros para a escolha dos projetos residenciais: a cidade de São Paulo como referência (a exceção fica por conta da casa Almeida Sobrinho, de Vilanova Artigas, construída em Santos, pela qualidade e importância no caminho profissional do arquiteto), as casas que chegaram à fase construtiva e que representaram procedimentos marcantes na ação metodológica dos arquitetos analisados.

Como concepção de trabalho buscamos, inicialmente, tomar conhecimento de todos os projetos residenciais dos dois arquitetos. Assim, analisamos quarenta e um projetos de Rino Levi, produção iniciada em 1927, com a reforma da casa Gofredo da Silva Telles, até o ano de 1964. Definimos dezessete projetos que aqui estão apresentados constando de plantas, perspectivas e imagens fotográficas.

Quanto à produção de Vilanova Artigas seguimos procedimentos idênticos: fizemos o levantamento de cento e cinquenta e três projetos residenciais, desde a casa Henrique Arouche de Toledo, de 1938, até o ano de 1984. Definimos, de toda a produção, vinte e seis projetos que fazem parte deste volume, constando de plantas, perspectivas e imagens fotográficas.

Quarenta e três projetos residenciais, período 1927-1974, estão aqui representando parte das produções de Rino Levi e Vilanova Artigas, dois grandes expoentes da arquitetura moderna paulistana.

Agradecemos ao escritório Rino Levi e à Fundação Vilanova Artigas que nos permitiram ter acesso a todos os projetos que necessitamos e poderemos realizar esta tese que esperamos seja de real valia a todos que buscam compreender o trabalho do arquiteto, sua linha de raciocínio e seu método de concepção.
